

~~detecting an object touching the touch screen;~~
detecting the location of the object on the touch screen;
detecting x and y coordinates of a point of contact of the object on
the touch screen;

detecting when the object is no longer touching the touch screen
and measuring a time duration from the time of detection of the object first
touching the touch screen until the time of detection of the object no longer
touching the touch screen; and

determining inputted data based on the detected location of the
object on the touch screen and the measured time duration.

Please add the following new claims.

~~--39. The method according to claim 1, wherein the determining inputted
data corresponds to displaying a focus screen of the object that indicates
information about the selected object.~~

40. The method according to claim 1, wherein the determining inputted
data corresponds to a drag function.

41. The method according to claim 1, wherein the determining inputted
data corresponds to showing a hidden text under a touch input.
